You will get one point for this problem.

[All Submissions \(/DI17R053/status/MU27\)](#)

You are given two strings, say A and B, of the same length, say N. You can swap A[i] and B[i] for all i between 1 and N, inclusive. You cannot swap two characters within A, or within B. Also, you can only swap a character in A with the character at the same index in B, and with no other character. You can perform this operation zero or more times.

You wish to modify the strings through the operations in such a way that the number of unique characters in the strings is small. In fact if n(A) is the number of unique characters in A and n(B) is the number of unique characters in B; you wish to perform the operations such that max(n(A),n(B)) is as small as possible.

Print the value of max(n(A),n(B)) after all the operations.

Successful Submissions

+

Input

The first line of input contains T, the number of test cases. Then follows the description of T test cases. Each test case contains the number N on the first line. The next two lines of the test case contain two N letter strings, A and B respectively. The letters are lowercase english letters.

Output

Print a single line for each test case. Print the value of max(n(A),n(B)) after all the operations are performed such that the value is as small as possible.

Constraints

$1 \leq T \leq 100$
 $1 \leq \text{length}(A) \leq 16$
 $\text{length}(B) = \text{length}(A)$

Sample Input

```

3
7
directi
itcerid
5
ababa
babab
5
abaaa
baabb

```

Sample Output

```

4
1
2

```

Explanation

In the first test case, initially $\max(n(\text{directi}), n(\text{itcerid})) = 6$. You can modify the two strings such that they are "iireri" and "dtcectd". String A has 3 unique characters and String B has 4 unique characters. Hence answer is 4. You cannot do better.

[CodeChef \(http://www.codechef.com/\)](http://www.codechef.com/) - A Platform for Aspiring Programmers

CodeChef was created as a platform to help programmers make it big in the world of algorithms, **computer programming** and **programming contests**. At CodeChef we work hard to revive the geek in you by hosting a **programming contest** at the start of the month and another smaller programming challenge in the middle of the month. We also aim to have training sessions and discussions related to **algorithms**, **binary search**, technicalities like **array size** and the likes. Apart from providing a platform for **programming competitions**, CodeChef also has various algorithm tutorials and forum discussions to help those who are new to the world of **computer programming**.

[Practice Section \(https://www.codechef.com/problems/easy\)](https://www.codechef.com/problems/easy) - A Place to hone your 'Computer Programming Skills'

Try your hand at one of our many practice problems and submit your solution in a language of your choice. Our **programming contest** judge accepts solutions in over 35+ programming languages. Preparing for coding contests were never this much fun! Receive points, and move up through the CodeChef ranks. Use our practice section to better prepare yourself for the multiple **programming challenges** that take place through-out the month on CodeChef.

[Compete \(https://www.codechef.com/problems/easy\)](https://www.codechef.com/problems/easy) - Monthly Programming Contests and Cook-offs

Here is where you can show off your **computer programming skills**. Take part in our 10 day long monthly coding contest and the shorter format Cook-off **coding contest**. Put yourself up for recognition and win great prizes. Our **programming contests** have prizes worth up to INR 20,000 (for Indian Community), \$700 (for Global Community) and lots more CodeChef goodies up for grabs.
